

SWEDEN HUNGARY

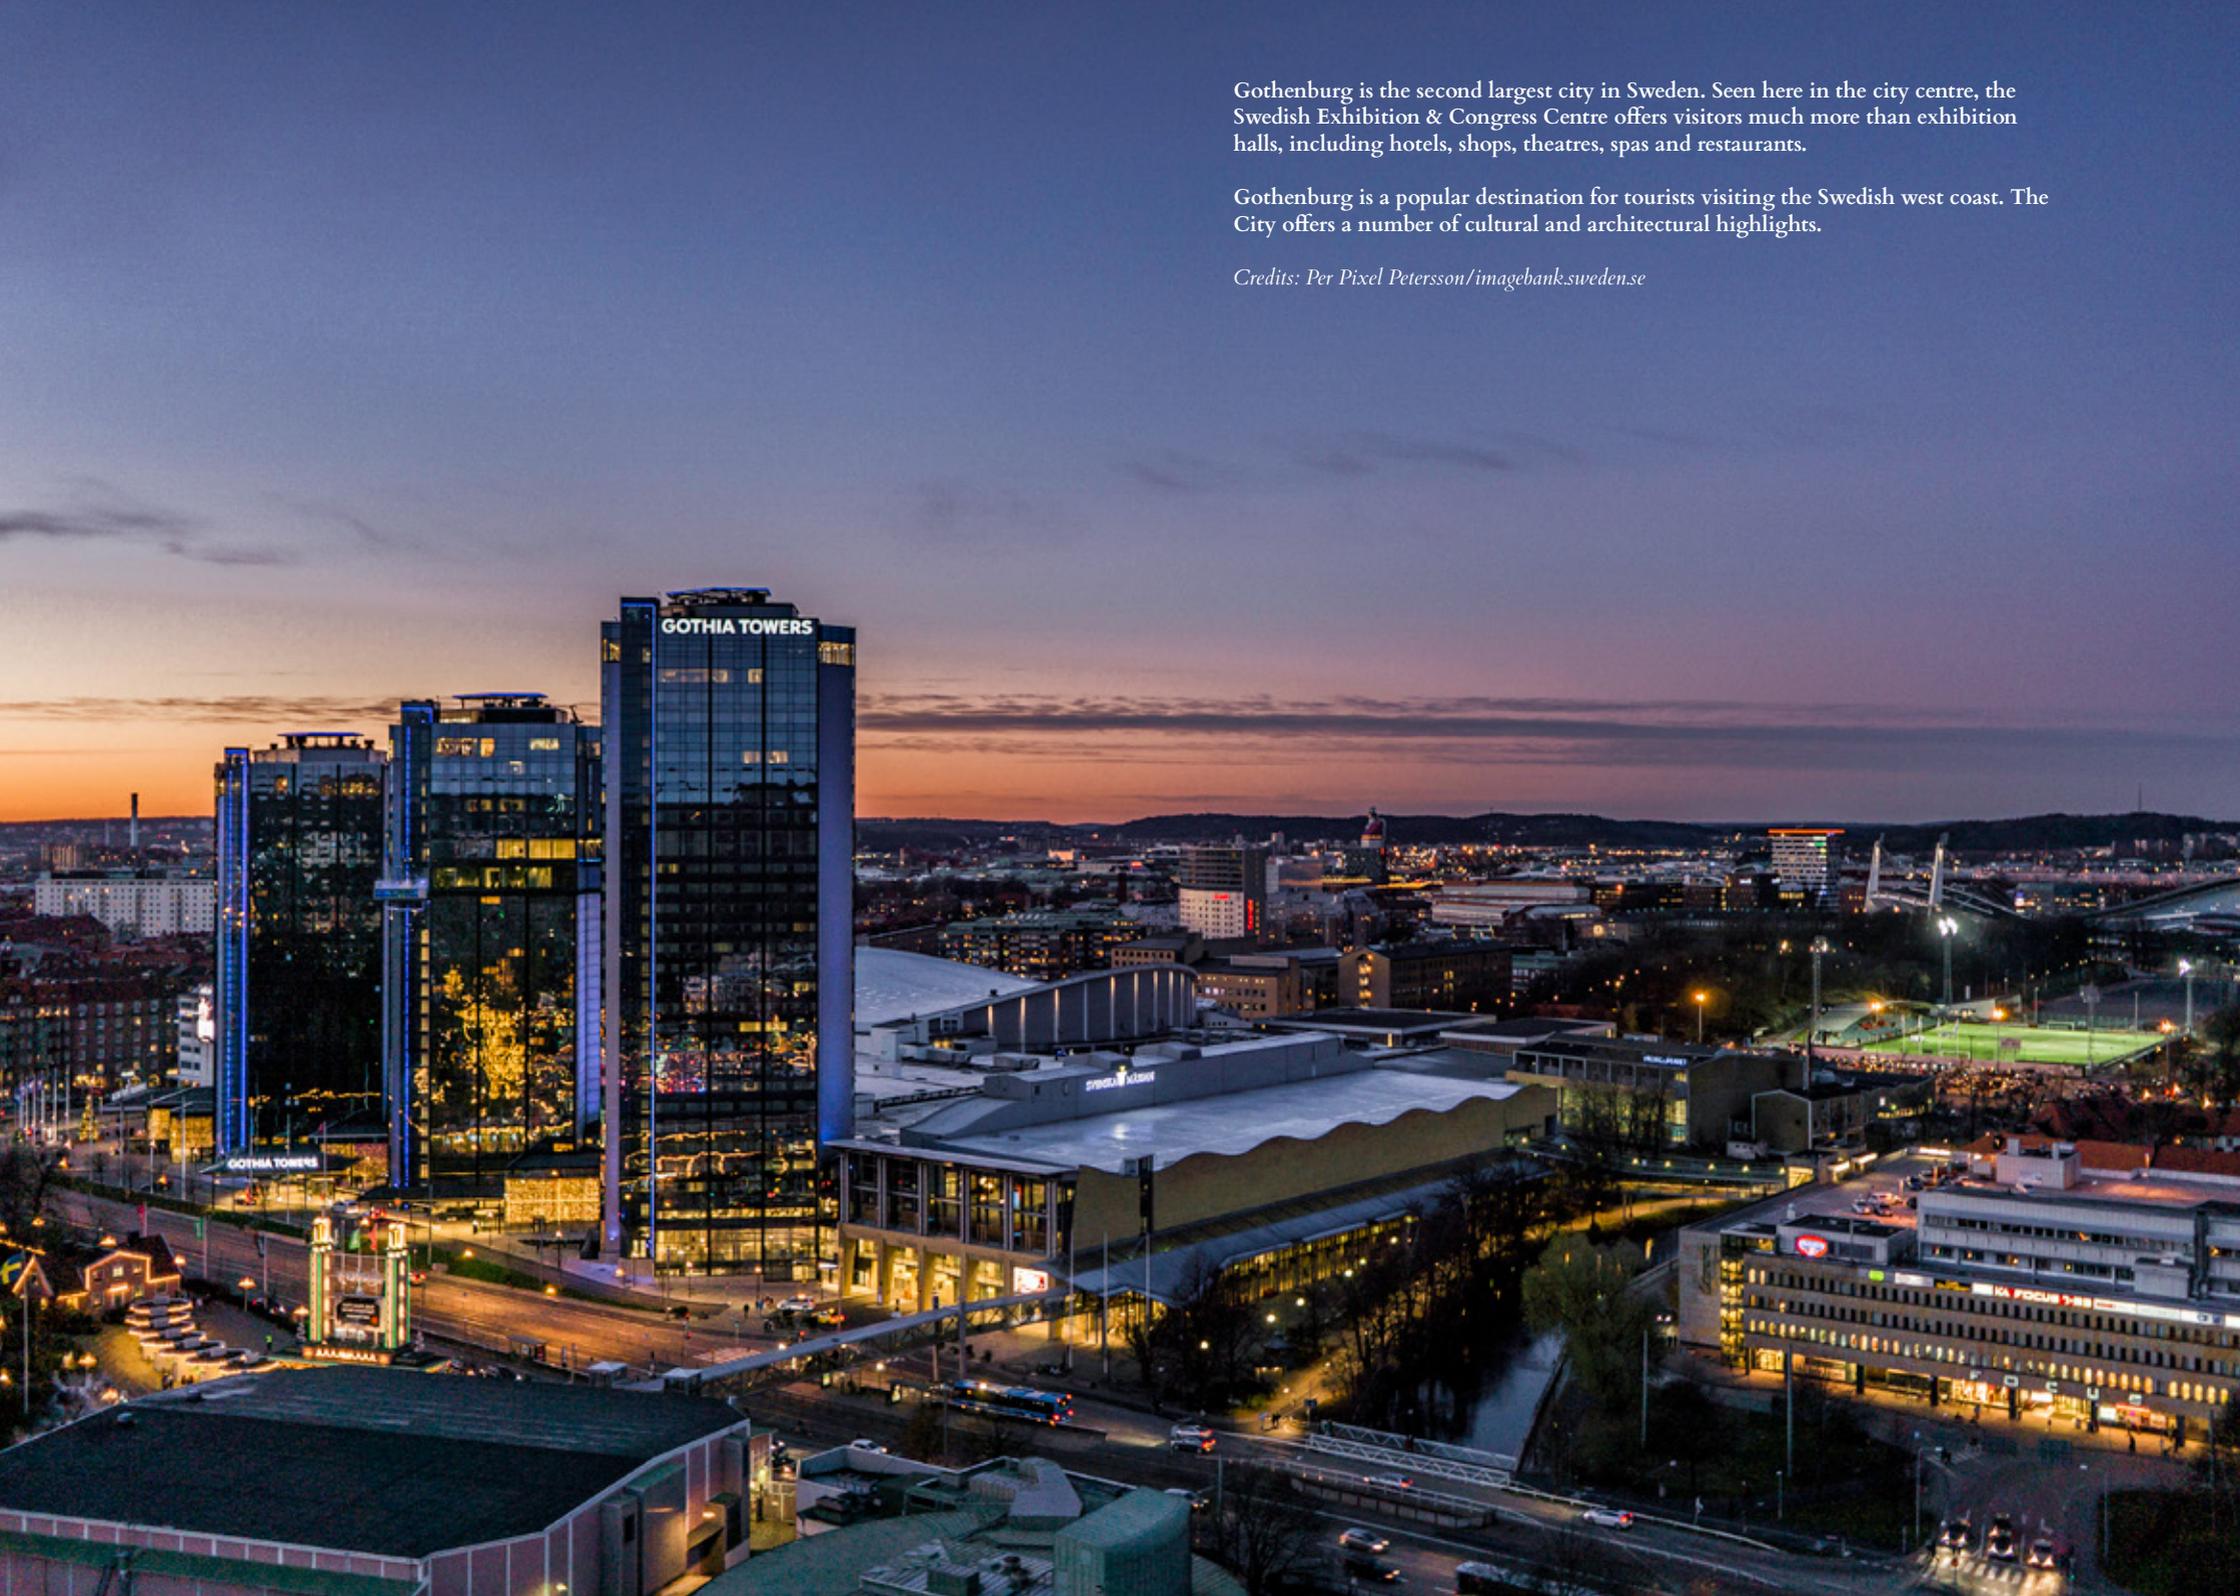

Business Guide 2016

Gothenburg is the second largest city in Sweden. Seen here in the city centre, the Swedish Exhibition & Congress Centre offers visitors much more than exhibition halls, including hotels, shops, theatres, spas and restaurants.

Gothenburg is a popular destination for tourists visiting the Swedish west coast. The City offers a number of cultural and architectural highlights.

Credits: Per Pixel Petersson/imagebank.sweden.se

Sweden and Hungary are close partners within the European Union. The economic cooperation between our countries benefits from the fact that since 2004 we have shared the same, single European home market, allowing for free trade and investment between our companies, as well as free movement of people. But the bilateral economic cooperation goes back much further. More than 100 years ago, LM Ericsson, already then a manufacturer of telephone equipment, started operations in Hungary. In more modern times, many well-known Swedish brands have been present on the Hungarian market for decades. Swedish companies were early to grasp the opportunity to invest when Hungary re-joined the western European market economy after the collapse of the communist regime in 1989. Two prominent examples are the establishment of IKEA in Hungary in 1990, and the acquisition of Lehel, the largest Hungarian home appliances company, by Electrolux in 1991.

Today, almost 200 Swedish companies are present in Hungary – and many more Swedish brands. Almost 20,000 Hungarians are directly employed by Swedish companies, and many more are indirectly dependent on the activities of these companies. So far, there are only a few Hungarian companies present in Sweden, although many Hungarian products reach the Swedish market through imports. In fact, Hungary has a positive trade balance with Sweden. Trade figures are hard to measure in a globalised economy however. For example, many of the Swedish multinational companies present in Hungary produce, export and import products and services from here, and to/from many other countries, rather than through Sweden. Hence the value of the bilateral economic exchange should be seen in a larger context, involving a combination of trade, investments, and production.

Swedish companies in Hungary are represented in many different sectors of the economy, from manufacturing, to services and retail. Traditionally, many of these companies are innovation driven, technological leaders and parts of larger multinational groups, thereby contributing largely to integrating Hungary in the advanced globalised economy. The automotive cluster is one example of this, with Swedish companies and brands like Volvo, Scania, Autoliv and Haldex which all have a presence in Hungary. Sweden and Hungary today share a position as important production countries in the automotive sector – a promising area for increased cooperation. In particular, there should be interesting opportunities for future creative partnership in the field of Industry 4.0 – the Fourth Industrial Revolution, since Swedish companies like Ericsson, Sigma Technology and ABB, which are all present in Hungary, are in the forefront of smart technologies.

In the retail sector, most Hungarians are quite familiar with IKEA and H&M, two Swedish companies which are expanding their sales and opening new stores, providing work opportunities for a large number of employees in this country.

Another flagship of Swedish-Hungarian bilateral cooperation is, of course, the strategic defence partnership provided through the SAAB Gripen fighter-jet programme. Now in its tenth year, it is hard to overestimate the significance of this long-term, cutting-edge, high-tech collaboration for the two countries, providing a crucial, state-of-the-art defence capability for the Hungarian Air Force.

The Embassy of Sweden in Budapest is working in close cooperation with Business Sweden, the Swedish Trade and Invest Council and the Swedish Chamber of Commerce in Hungary, to support the Swedish business community and to promote increased trade and investment between our countries. We call this combination Team Sweden in Hungary – all of us cooperating as an umbrella organisation to support Swedish-Hungarian export and investments. Together, Team Sweden can advise and assist companies to identify partners, market opportunities and financing options, and to deal with potential regulatory issues. Team Sweden is also an entrance to further contacts with other authorities and organisations in Sweden and Hungary.

This first edition of the Sweden-Hungary Business Guide sets out to present a broad overview of the Swedish business presence in Hungary, supported by some basic economic indicators of the two countries. By highlighting what Sweden has to offer here in Hungary, we are confident that even more business opportunities will be identified and realised in the future. Indeed, we are convinced there is enormous potential for expansion in commercial relations between Sweden and Hungary in the years to come – to everyone's mutual benefit. Team Sweden is ready to work hard to make this come true!

Foreword

THE EMBASSY OF SWEDEN IN BUDAPEST

The Embassy's mission is to represent Sweden in Hungary and to strengthen Swedish-Hungarian relations and networks across a broad spectrum of interests and avenues. We monitor and analyse political development in Hungary, assist Swedish citizens in consular matters, we communicate and promote Swedish culture, views and values, and, last but not least, support Swedish business interests. This work is mainly conducted by engaging in a continuous dialogue with the Hungarian government, other official representatives, public authorities, political parties, civil society, cultural institutions, media and business representatives and, inevitably, a large number of individuals.

A core task for the Embassy is to strengthen Swedish-Hungarian trade and investment relations. Increased trade is essential to achieve economic growth, employment and increased prosperity. The Embassy, in close cooperation with Business Sweden, can offer Swedish companies already present in Hungary, as well as those planning to establish their presence here, valuable advice along with a wide network of contacts, especially with Hungarian public authorities.

Consequently a large part of the Embassy's activities and contacts with Hungarian officials are conducted within the EU framework. The Embassy is monitoring and following up on any obstacles to the free movement within the EU. Swedish companies experiencing any form of trade barriers are urged to report these to the Embassy for further action. The Embassy can also assist Hungarian companies interested in doing business with Sweden.

Sweden and Hungary are close partners in the European Union. The ideas, values and principles of European cooperation are fundamental to our countries. Both Sweden and Hungary benefit significantly from the Single European Market, with its free movement of goods, services, persons and capital.

In 2015, the Swedish Government launched a new Export Strategy. Key elements of this include measures to make exports and imports easier, further improving the mobility of people moving to and from Sweden, strengthening Sweden's image and reinforcing Sweden's ability to attract talent. Furthermore, the Export Strategy identifies a need for stronger coordination between all the institutions involved in supporting Swedish enterprises. These institutions will, in future, work under one collective umbrella referred to as "Team Sweden". Hence, under the leadership of the Embassy, a local Team Sweden circle, including Business Sweden and the Swedish Chamber of Commerce in Hungary, has recently been formed in Hungary. This Business Guide is a concrete example of Team Sweden cooperation.

Swedish companies generally have a strong sustainability profile. They are often in the forefront when it comes to environment protection, gender equality and anti-corruption measures. The Embassy strongly encourages and supports these companies in this work, with the goal of raising the general level of knowledge about sustainable business. The Embassy also prioritises presenting the Swedish labour market model, which is based on values such as equality, consensus seeking and work and life balance.

Since 2014, the work of the Embassy has been led by H.E. Ambassador Niclas Trouvé. It currently employs some 15 staff members, and with the entire Team Sweden in Hungary, the total number of staff is around 20.

Business Sweden

Business Sweden – was founded on January 1, 2013 by a merger of the Swedish Trade Council (Exportrådet) and Invest Sweden. With 52 offices in almost 50 countries and across all continents, Business Sweden's purpose is to help every Swedish company to reach its full international potential, and help companies abroad to reach their potential by investing in Sweden. Investments include new establishments, strategic partnerships, R&D collaborations, capital investments, and the expansion of existing operations. Business Sweden supports Swedish companies in reaching export markets and helps create business opportunities for small and medium-sized enterprises to grow internationally.

Business Sweden is owned by the Swedish Government and the private business sector, a partnership that provides access to contacts and networks at all levels. In addition to its global network of regional advisers and foreign offices, we work with Swedish embassies, consulates and partners around the world. Having access to networks with key decision makers in local markets, Business Sweden offers strategic advice and hands-on support with in-depth knowledge about specific market conditions and local cultures.

The Budapest office was established in 1971, originally as the Swedish Trade Council, but now known as Business Sweden. In Hungary, the Swedish business community has been active for many decades, and the Swedish brands stand for high quality and trust. Almost 200 companies and 20 manufacturers have established successful operations covering a wide range of sectors, including: healthcare and life sciences, materials and manufacturing, transport and automotive, telecom and IT, security and defence, energy and environmental technology and retail and consumer products.

A strategic bilateral relationship in the field of defence has contributed significantly to the fact that Hungary and Sweden have enjoyed mutually beneficial industrial cooperation for decades.

This has very much to do with the process that led to Hungary's decision in 2001 to lease/procure 14 Swedish JAS 39 Gripen Multi-Role Fighter Aircraft to replace its Soviet-era air force heritage.

The decision to go for the Gripen was taken by PM Viktor Orbán personally – then serving in his first term as Hungary's Prime Minister – and the deal was intimately connected to a large industrial cooperation package offered by the Swedish Investor Group. This included (and still includes) Saab and several other major Swedish multinational companies.

This package resulted in the creation of several thousand jobs in Hungary, significantly adding to the growth and development of society. While many examples could be mentioned, perhaps the success story of the development/establishment of the still blooming Electrolux factories in Jászberény and Nyíregyháza is the most brightly shining example.

The Hungarian government has recently announced that it is committed to increase its defence spending, ultimately to approach the NATO requirements, i.e. to 2 per cent of the country's GDP. This process, which started in 2015, will take place by 0.1 per cent incremental steps over a 10 year period.

Since a large portion of the planned increase will be used for modernisation of systems and equipment, it presents a significant potential for Swedish companies, both as suppliers/contractors for the defence equipment across a wide range of areas, and indirectly as part of industrial cooperation packages.

Overall, the Hungarian-Swedish strategic bilateral relations in the defence sector have proved strong and highly successful for both sides. We look forward to further develop the cooperation.

Swedish-Hungarian diplomatic relations were raised to the level of ambassador in 1964. After the Hungarian regime change in 1989-1990 bilateral relations between the two countries started to develop rapidly. Being the only official representation of Hungary in Sweden, the Embassy of Hungary in Stockholm covers political, economic, consular as well as cultural relations and one of its diplomats is responsible for keeping contact with the members of the Hungarian diaspora. Since 2013 the Hungarian ambassador is H.E. Ms Lilla Makkay. The Embassy also has a Military Attaché's Office. In addition, Hungary has two honorary consuls in Sweden, serving Hungarian interests and assisting citizens (see below).

Apart from active political and cultural relations with Sweden, the Embassy of Hungary pursues dynamic economic diplomacy. On one hand, Swedish companies are advised about investment opportunities in Hungary and are offered assistance in expanding their businesses to Hungary. On the other hand, the Hungarian companies are given assistance to find the best possible options for their export activities on the Swedish market.

HUNGARY

The perfect investment location

Make the most of Hungary's strategic location, highly qualified and cost-effective labour force and the world-class infrastructure

Hungary is located in the heart of Europe, granting easy access to both Western and Eastern European markets. With its stable macroeconomic and investor-friendly political environment, Hungary is the perfect location for your investment. In addition, YOU CAN RELY ON GLOBALLY ACKNOWLEDGED HUMAN CAPITAL AT A REASONABLE COST. Hungary has a well-recognised education system, with many recognised universities applying a practical approach, which plays a major role in the training of the labour force.

BUDAPEST IS ONE OF THE MOST ATTRACTIVE EASTERN EUROPEAN CITIES

Therefore it comes as no surprise that Budapest is among the most attractive Eastern European cities for foreign direct investment (FDI) in the "European Cities and Regions of the Future 2016-2017" ranking of fDi Magazine, a publication of the Financial Times Group.

FULLY DEDICATED TO ENSURING THE SUCCESS OF YOUR INVESTMENT

The Hungarian Investment Promotion Agency (HIPA) provides free of charge one-stop-shop management consultancy services for companies intending to invest in Hungary. We help our clients to prepare and implement strategic investment decisions, as well as providing post-decision support. We support your company by offering tailor-made information about the business environment and on incentive packages, dealing with public authorities, organising site and reference visits as well as connecting your company with potential suppliers in Hungary.

The world's most prestigious award

The **Nobel Prize** is the legacy of Sweden's Alfred Nobel (1833–1896). Prizes are awarded to 'those who, during the preceding year, shall have conferred the greatest benefit on mankind.' The Nobel Prize Award Ceremony is held at 10 December in the Stockholm Concert Hall where the winners in Physics, Chemistry, Physiology or Medicine, and Literature receive a medal from H.M. the King of Sweden, as well as a diploma and a large cash award. The ceremony is followed by a gala banquet. The Nobel Peace Prize is awarded in Oslo City Hall on the same day. **Since the start of the prize 13 of the Nobel Laureates have been of Hungarian origin, which puts Hungary on the top list of Nobel Prizes per capita.**

Sweden

Sweden today has a diverse, highly competitive and successful economy. The country's present economic prosperity, along with its social well-being, is built on the combined success of a large number of Swedish companies. In many cases, these were started more than 100 years ago, and have ever since provided a combination of high-grade employment and economic growth, along with technological leadership and development. The lessons learned from the financial crisis in the early 1990s, when successive governments pursued policies based on economic reform and fiscal sustainability, have subsequently become institutionalised. They constitute an important factor behind the stability of today.

A key feature of the Swedish economy is its openness and liberal approach to trade. Sweden is an export-oriented nation, enjoying a large trade surplus and exporting a variety of goods. The main industries include motor vehicle manufacturing, telecommunications, pharmaceuticals, industrial machines, precision equipment, chemical goods, home goods and appliances, pulp and paper, and iron & steel. While maintaining its competitiveness in goods and manufacturing, growth in modern service sectors such as information and communication technology, and in creative industries like music, gaming and fashion is especially strong in Sweden. The start-up scene ranks among the most innovative and dynamic in the world.

Hungary

Hungary set about re-establishing a market economy immediately after the peaceful transition to a parliamentary democracy in 1990. After being hit hard by the financial crisis in 2008, the Hungarian economy has since returned to growth, with expansion of 2.9 per cent in 2015. The macroeconomic imbalances are being corrected with the current account and trade balance posting record surpluses, and the public debt-to-GDP ratio falling. A key driver behind faster growth is more rapid capital accumulation, with inward FDI and EU structural funds acting as strong investment drivers. The Hungarian economy is highly dependent on foreign trade, with exports amounting to around 80 per cent of the country's GDP.

Major industries include, motor vehicles, information technology, pharmaceuticals, chemicals, metallurgy, machinery, electrical goods, food processing and tourism. Hungary is the largest electronics producer in Central and Eastern Europe and the automotive industry is the fastest growing sector of the Hungarian economy. It can be described as a clustered industry, resulting in companies being able to take advantage of the benefits of geographical proximity and the existence of critical mass. The automotive industry accounts for around 10 per cent of the country's GDP and employs more than 150 thousand people.

However, income levels in Hungary are still well below those in more advanced western economies and domestic small and medium enterprises need to be further integrated into global value chains. Raising the female participation in the labour market constitutes an opportunity for further growth in the economy.

GDP Growth

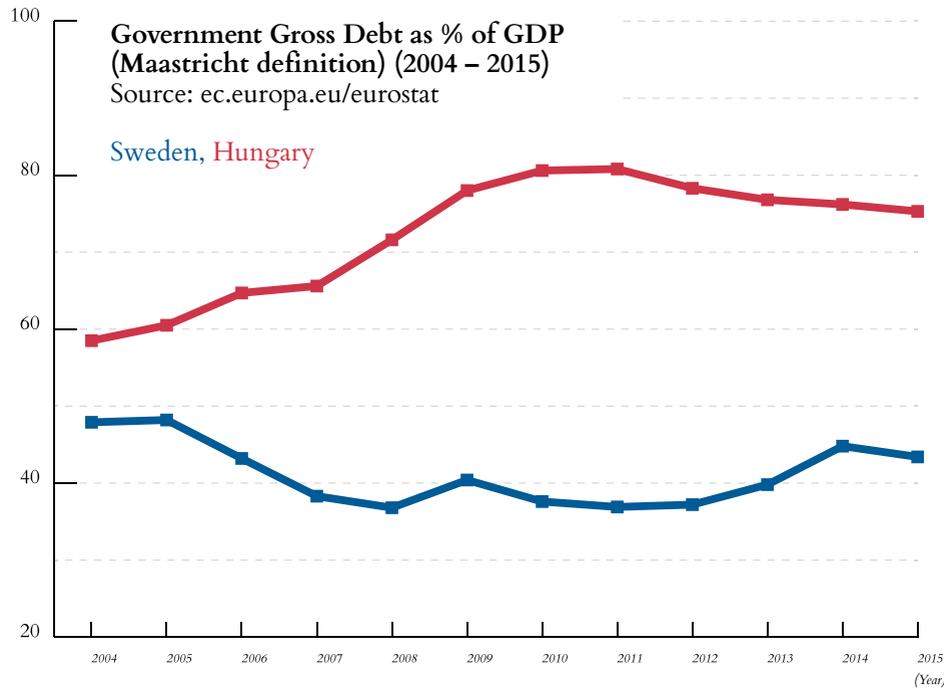

Both the Swedish and the Hungarian economies have recovered from the financial crisis in 2008, and in both countries we see a positive and substantial GDP growth.

Government Gross Debt

The Swedish government gross debt has fallen sharply since the end of the 1990's and is now well below 50 per cent of GDP. In Hungary the government debt has fallen since 2010 and a prioritized goal of the current government is to further decrease the debt and to have a zero-deficit state budget.

Sweden

Sweden is one of the world's most globalised countries, with strong public finances and good economic growth, open and deregulated markets, an efficient and transparent public sector, and competitive business taxation. Sweden is one of the world's largest investors and the country also maintains a high level of appeal to foreign investors. Sweden is typically regarded as a frontrunner in adopting new technologies and as one of the most innovative countries in the world. Synergies generated by the close cooperation between Swedish universities, research institutes and the private sector leverage the R&D output. The high usage of computers and IT-systems has further improved productivity throughout the entire economy.

Sweden is also a leader in setting new consumer trends. In no other country is the average market take-off so rapid. Sweden's test market for new technologies ranked among the top five in the Global Innovation Index in 2015. Stockholm is the business and financial centre of northern Europe. Almost half of all multinationals' headquarters with operations in Scandinavia are located there.

Hungary

Since the regime change in 1990, successive Hungarian governments have shown commitment to attract foreign investments. Hungary has one of the highest rates of FDI stock per capita in Central and Eastern Europe. Its location at the heart of Europe, its well-developed telecom and transport systems, excellent logistics services and well-educated workforce are all factors that have contributed to attracting foreign investments in recent years. The most dynamic sectors of the economy with clear growth potential include: health care & life science, energy and environmental technology, food industry, transport and automotive, telecom, information technology, security and defence.

Budapest is the financial and business capital of Hungary, accounting for around 40 per cent of the national income. In 2015 Forbes labelled Budapest one of five entrepreneurial hubs in Europe.

Swedish – Hungarian Relations

Trade - Sweden and Hungary have had strong trade relations for many years. Swedish export to Hungary reached € 600 million in 2015, corresponding to 0.5 per cent of Sweden's total global exports. The main export commodity groups comprised engineering products, processed foods and pharmaceuticals. In 2015, Hungarian export to Sweden totaled around € 950 million, a jump of 32 per cent on 2014, with engineering and agricultural produce the main commodity groups.

Swedish-Hungarian Trade

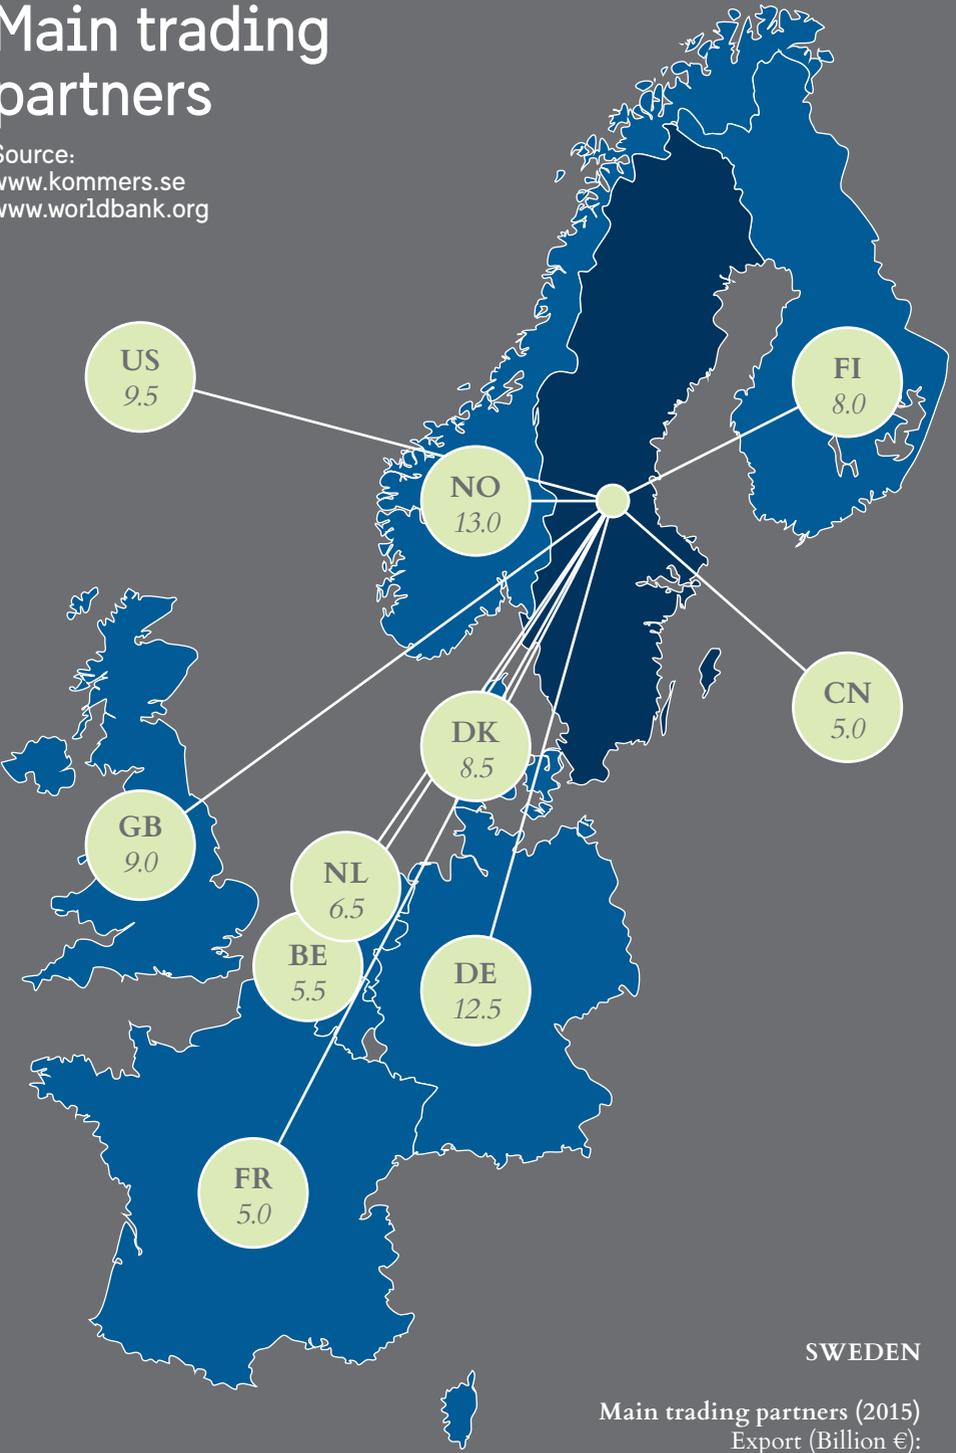

Swedes in Hungary - Approximately 2,000 Swedish citizens are estimated to live in Hungary, a large proportion of whom are students, mainly located in Budapest and the larger university cities like Debrecen, Szeged and Pécs. Many study medicine or veterinary science, but economics, engineering, music and art are also popular programmes.

Hungarians in Sweden - Approximately 16,000 Hungarians live in Sweden today. If people of Hungarian descent are also added, the number rises to approximately 35,000. In 1956, following the failed popular uprising against Soviet oppression, almost 8,000 Hungarians sought refuge in Sweden. The vast majority of them were quickly integrated into Swedish society. Today, many young Hungarians choose to move to Sweden to work or study.

Swedish Companies in Hungary

In the following section we present more than 80 of the around 200 Swedish companies that are established in Hungary

The Port of Gothenburg is Scandinavia's largest, with over 11,000 vessel calls each year from 140 destinations. The Swedish economy is dependent on trade, and this environmentally sound link to faraway places is vital to Swedish industry.

A tree hotel in the far north of Sweden, near the small village of Harads, close to the Arctic Circle.

Designed by Tham & Videgård architects, the tree hotel is a structure hung around a tree trunk, a box clad in mirrored glass. The exterior reflects the surroundings and the sky, creating a camouflaged refuge. The interior is all made of plywood and the windows give a 360 degree view of the surroundings. To prevent birds colliding with the reflective glass, a transparent ultraviolet colour is laminated into the glass panes which are visible for birds only. The most striking part of Harads is its magnificent surroundings. From Treehotel's rooms you get a fantastic view of the Lule River valley, miles of forest and the powerful river.

WHAT YOU SHOULD KNOW ABOUT AUTOLIV

Autoliv is the world's largest automotive safety supplier with sales to all the leading car manufacturers in the world. We develop, manufacture and market airbags, seatbelts, steering wheels, passive safety electronics and active safety systems such as radar, night vision and camera vision systems. We also produce anti-whiplash systems, pedestrian protection systems and integrated child seats. Our leading market position in automotive safety area includes the active and passive safety systems. It is resulted by the high level of innovation and the continuous improvement of our production systems.

With a passion for Saving Lives, we strive to create value in everything we do. We look at Autoliv in a number of different aspects in order to build a long-term, robust, sustainable operation. We always have the ambition to generate solid returns to our shareholders and act as a market leader.

Autoliv is engaging 64 000 employees worldwide in 27 countries working with 100 car brands and 1300 car models.

AUTOLIV IN SOPRONKÖVESD

Autoliv Kft. situated in Hungary Sopronkövesd was established in 1991, and continuously developing since 1996. The plant produce high-end seat belts with state of the art manufacturing technology and methods for the world's leading car brands and types. Today it has more than 2500 employees. Beginning of September 2014 the West Pannon company has started a new building extension: the plant doubles the area of production and increases the number of employees till beginning of 2016. The plant extend it's area with new production hall

for seatbelt production, product quality testing, finished goods warehouse, new component warehouse to serve the increased production and a new social building for lockers and canteen. The investment is done to be more cost efficient and decrease the response time to the customers. The production and warehouse surface will be increased by 12.000 m², and further 2.000 m² will be built for lockers/canteen and additional offices. Thanks to the investment the factory is the biggest safety belt plant all over Europe.

AxFlow KFT

AxFlow serves an industry where processes need to run and systems need to work. Interruptions are costly. And unacceptable. We are Europe's leading source of pumps and pump expertise for the process industry. We intend to maintain that position by working fluidly and ceaselessly, to bring our customers the best. Established in 1989, AxFlow has continually focused on meeting the needs of, primarily, European process industries. We represent world-leading suppliers and add considerable customer value by industrial know-how, fast and reliable deliveries and a wide range of technical services. Our ambition is to meet the needs of local industry while, at the same time, offering one strategic distribution and customer service solution across Europe. Through its European Distribution Center, AxFlow is able to ship stock pumps and other equipment to its customers within 48 hours anywhere in Europe.

Exceptional Performance

No, we don't train elephants – but we do deal smoothly with a quite different type of heavyweights. On average, we print about 75 tonnes of paper a day!

It is not only due to our central geographical location that we can offer many advantages to customers far beyond the borders of Hungary. Our flexible production planning with highly efficient processes, innovative, state-of-the-art technology and a fully-developed logistics network guarantees short delivery times within 24 hours – even for large runs, the highest quality and an attractive price-quality ratio.

We are one of the most modern print shops in Hungary and we can satisfy the highest demands.

Ericsson Magyarország Kft.

Ericsson Hungary employs 2000 people, and its activities are built on three pillars. Ericsson Hungary is the largest company of Hungary active in the area of telecommunication and information technology research, software and hardware development. In its activities the education – basic research – applied research – industrial implementation chain is exemplary. The second pillar is the Service Delivery Center where highly educated engineers participate in several countries worldwide in serving telecommunication systems, implementation, planning, installation, integration and support of various systems. As the third main area, Ericsson Hungary is provider of network technology and services for local telecom operators and enterprises: as strategic partner of Magyar Telekom, Ericsson is the exclusive supplier of its mobile network. Furthermore, Ericsson performs field maintenance services for domestic service providers.

Operation type: Sales office, Service Delivery Center, Research and Development Center
Established in Hungary: 1990.

A stunning scenic view as the sun sets on the west coast of Sweden, definitively worth capturing and uploading.

Sweden being geographically large with a small population has been a driving force in its development of infrastructure and communication, including mobile connectivity. Early action to promote digitalisation has meant that Sweden is now one of the most connected countries in the world with one of the highest rates of computer, internet and mobile penetration.

Green Fortune Hungary Kft

Green Fortune Group has been established in 2001, and already completed over 400 Plantwall projects in 16 countries. Green Fortune can offer all sizes and shapes of Plantwalls, from huge and medium sized Plantwalls down to modules, single or double sided, with different heights. Each new Plantwall project can be tailor made to suit different demands. The integrated drip irrigation system makes the watering very smooth. Via the drip irrigation system, also fertilizer is distributed inside the four-layer textile of the wall. This process is programmed by us and automatically controlled. Long-live guarantee, complete maintenance and service are also provided.

A nice swim as the midnight sun slowly descends is a great way to enjoy summer.

The waters of Sweden are warm only for a few months, so better make the most use of it. During the Swedish summer, the sun sets slowly, if at all. In the very north the sun stays up for a month or two around summer solstice, and in the south of Sweden a few hours of relative dark.

IKEA Industry Magyarország Kft

For over 60 years IKEA has been working to help create a better everyday life for the many people. We do it in small ways, answering needs related to life at home by creating well designed furnishing products that are attractive, functional, sustainable and affordable. That's because we believe most people share a desire for beauty, a need for functionality and a regard for saving resources - both their own, and the planet's.

IKEA Lakberendezési Kft.

“To create a better everyday life for the many people”, this is the IKEA vision. Our business idea is “to offer a wide range of well-designed, functional home furnishing products at prices so low that as many people as possible will be able to afford them”.

We work hard to achieve quality at affordable prices for our customers through optimizing our entire value chain, by building long-term supplier relationships, investing in highly automated production and producing large volumes. Our vision also goes beyond home furnishing. We want to create a better everyday for all people impacted by our business.

NOVUS INTERIÖR HUNGARY KFT

Founded in 1998 by a few entrepreneurs, NOVUS is a fast growing company within the sewing industry. Today we are more than 100 employees manufacturing a large variety of products ranging from sewing of interior components to leather covering of exclusive high-quality products. Our main customers are found within the European automotive industry represented by both car and truck OEM's as well as sub-suppliers. Our production is hosted in a modern facility that will be further extended during Y2016. We have a wide range of machines and equipment to manage both quality and efficiency requested by our customers. In addition, we have also kept the traditional hand craft competence to manage the exclusive and low-volume premium products.

Novus Interiör Hungary Kft. is a member of HAVD Group AB.

Kiruna, a mining town, is the northernmost town in Sweden. The entire town is in the process of moving, house by house, a little to the east. The ground under the town is about to become too unstable to support buildings due to the deep mining close by.

Kiruna's move will happen slowly, under a period of 85 years. As new neighbourhoods are built on Kiruna's eastern edge, old ones will be torn down. The idea is to preserve as much as possible of the town heritage, such as the earliest structures, including a clock tower and the town church. Buildings will be taken apart and reassembled in the new town centre. Other materials will be recycled and reused in new Kiruna's rebuilding and repair. Old Kiruna will be transformed into parkland.

GRIPEN

BEVETÉSRE KÉSZEN BÁRHOL,
BÁRMIKOR

A többcélú vadászgépként kifejlesztett Gripen a Saab intelligens, egyedi és funkcionális megoldásokra törekvő hagyományát testesíti meg. A Gripen az első olyan hadrendbe állított harci repülőgép, amely légi elfogó, földi célpontok elleni támadó és felderítő feladatokat is képes ellátni akár egyetlen bevetés során.

Masszív felépítésének köszönhetően a Gripen karbantartása egyszerűen és minden versenytársánál gyorsabban kivitelezhető, így a vadászgép mindig repülésre készen áll. A Gripen e tulajdonságai tökéletesen megtestesítik a Saab kínálta innovatív versenyelőnyt.

www.gripen.com

GRIPEN

A GYŐZELEM
KULCSA A TUDÁS

A Gripen minden pilóta álma. Könnyen repülhető, és teljesen a pilóta ellenőrzése alatt áll. Fürgesége és kiváló fordulékonyága miatt a közelharc igazi mestere. Fejlett ember-gép interfésze (HMI) és digitális „fly-by-wire” kormányvezérlő rendszere révén a pilóta teljes figyelmét az adott küldetésnek szentelheti.

A Saab nevével fémjelzett innovatív versenyelőny miatt valódi hálózatközpontú és többcélú harci repülőgép, amely a világ legfejlettebb, biztonságos és többfrekvenciás adatkapcsolatával büszkélkedhet. Teljesen integrált repüléselektronikai bevetésirányító rendszere és intelligens szenzorai révén a Gripen minden szerepkörben tökéletes harc helyzetismeretet biztosít.

Az SCA a világ egyik vezető higiéniai és faipari vállalata. A vállalatcsoport személyi higiéniai termékek, papírtermékek és faipari termékek fejlesztésével és gyártásával foglalkozik, a fenntarthatóság jegyében. Termékeit közel 100 országban forgalmazza olyan kiváló márkanevek alatt, mint például a világon piacvezető TENA és Tork, illetve olyan regionális márkanevek alatt, mint a Libero, a Libresse és a Zewa.

Az SCA társadalmi felelősségvállalás (CSR) programja keretében, szakmai partnereivel való közös összefogásnak köszönhetően megépült az Anyák Háza a Bethesda Gyermekkórházban. Az SCA ezzel a tevékenységével 2014-ben elnyerte a CSR Hungary, 2015-ben a Magyar PR Szövetség „Példaértékű CSR Gyakorlat” díját.

SCANIA Hungária Kft.

Scania is a global company with a sales and service organisation in more than 100 countries. Aside from sales and services, Scania offers financial services in many markets. Scania's production units are located in Europe and Latin America. Scania has approximately 42,000 employees. Of these, some 18,400 work with sales and services in Scania's own subsidiaries worldwide. About 12,400 people work at production units in seven countries and regional product centres in six emerging markets. Dedicated employees, flexible production, the modular system, a strong quality focus, an extensive service network, and cutting-edge R&D comprise our strengths. Together, these qualities make Scania resilient and give us a strong leadership position in a world increasingly dependent on safe, sustainable and efficient transport systems.

Operation type: In Hungary besides the importer, there are six Scania dealers and workshops owned by Scania CV AB. An additional privately owned workshop exists in the country.

SciAmuS

The SciAmuS represents the interests of businesses and companies independently. SciAmuS was founded in 2003 to benefit its clients with the knowledge and experience of the founding partners which accumulated over decades of business management practices at Swedish and Hungarian companies. Initially, telecommunication was only one branch of the consulting activities, in addition to financial and general management projects. Due to the overwhelming success of the internally developed cost optimization methodology, today SciAmuS contracts exclusively for telecommunication work. SciAmuS has become the leading telecommunication consulting company in Central-Eastern Europe. SciAmuS has a very diverse clientele comprising of international financial institutions, manufacturing companies, retail chains, hospitals, TV stations, logistical companies, research- and IT-companies.

Many of the underground transport stations in Stockholm are decorated by artists and the system has been called the longest art gallery in the world. This is Rådhuset (Court House) station.

The rapid transport system in Stockholm (metro, subway, tube, underground), consists of 100 stations and is one of the world's largest underground systems in relation to population served. The system consists of 47 underground stations and 53 that are above ground. In 2013, the metro carried 328 million passengers. A full length train is about 140 metres long and takes about 1,250 passengers. The maximum speed is 80 kilometres per hour.

The coastline of Bohuslän is somewhat of a paradis for kayaking. There is something for everyone, from the experienced kayaker to the beginner. Bohuslän's varied nature offers everything from open sea, stark cliffs and islets to the wilderness and its lakes.

Allemansrätten, or the Right of Public Access, is one of the unique joys of living in Sweden. It allows anyone to roam freely in the countryside, swim and travel by boat in someone else's waters and pick mushrooms and berries in the forest.

SKANSKA

Skanska

Skanska Property Hungary Ltd is one of the leading property developers with a focus on project, leasing and facility management. We have developed 168,000 sqm of commercial space, among them Hungary's first LEED platinum qualified Green House and the internationally awarded Science Park. Besides the six previously developed office buildings in Budapest, there are other developments in the pipeline. We have two ongoing projects, one is Nordic Light, its completion is in Q3 2016. The elegant and energy-efficient building situated at Budapest's busy Váci Road office corridor. The other ongoing office building project is Mill Park, situated in the Soroksári út. With its unique architectural features and sustainable solutions, Mill Park will be also a great addendum to Skanska Property Hungary's portfolio of green buildings.

Operation type: Office building development
Established in Hungary: 1987

SKF

SKF has been a leading global technology provider since 1907. Nowadays the company is present in nearly all industries. SKF groups its technologies on five platforms: Bearings and Units, Seals, Mechatronics, Services and Lubrication Systems. By utilizing capabilities from the platforms, SKF develops tailor-made offers for each industry, helping customers improve performance, reduce energy use and lower total costs. The Hungarian subsidiary, SKF Svéd Golyóscsapágy Zrt. works without break in our country since 1928. The company is a market leader in Hungary with the help of its authorized distributor network, having more than 60 outlets.

Operation type: Sales unit
Established in Hungary: 1928.

Stora Enso Packaging Kft.

Stora Enso is a leading provider of renewable solutions in packaging, biomaterials, wood and paper on global markets. Our customers include packaging, joinery and construction industries as well as publishers, printing houses and paper merchants. Our aim is to replace non-renewable materials by innovating and developing new products and services based on wood and other renewable materials. Our focus is on fibre-based packaging, plantation-based pulp, innovations in biomaterials, and sustainable building solutions.

SveMa Research Kft.

SveMa Research Kft works towards businesses, mainly stock exchange listed companies and organizations.

We work with our own developed service in Sweden since 1985. Our products are now a familiar concept to our customers and are found in most industries. SveMa's core competitive advantage lies in being a low cost company. We have methodically built up the organization, procedures, systems and delivery networks with quality and cost efficiency as the main objective. That means we can with a profit offer market surveys with the same content as traditional research institutions but at a significantly lower price.

Tetra Pak

Tetra Pak offers much more than just packaging equipment for liquid food products. We also provide a range of processing and packaging technologies for use with a broad array of products, from ice cream and cheese to fruit, vegetables and pet food. We supply complete systems for processing, packaging and distribution, designed to optimise the use of resources. Our processing systems are not only developed to treat the products gently, but also to minimise the use of raw materials and energy during manufacture and subsequent distribution. We are committed to reducing the environmental impact of our operations and to enhancing the environmental performance of our products and solutions.

Hydro power, or power from water, has long been a source of energy in Sweden.

Sweden is home to a number of major rivers. Rivers are used for recreation such as river rafting or swimming. But Sweden has a great environmental consciousness and in its search for non-fossil fuels, nearly half of the energy production comes from hydro power. Successful Swedish research into generating power from waves may reduce the need of dams to generate hydro power in the future.

Volvo Auto

The first Volvo rolled off the production line in Gothenburg way back in 1927 and since then, we've gone from strength to strength, creating world-changing innovations along the way. During the years Volvo Cars became a global brand with manufacturing in Sweden, Belgium and China producing a premium range of cars that includes sedans, wagons, sportswagons, cross country cars and SUVs. Volvo Car Group (Volvo Cars) is owned by Zhejiang Geely Holding (Geely Holding) of China, but the management, design and planning takes place in Sweden, which indicates Volvo to be a truly Scandinavian brand.

Our vision is to be the world's most progressive and desired premium car brand. We believe our global success will be driven by making life less complicated for people, while strengthening our commitment to safety, quality and the environment.
