

Dear Members,

I am happy to announce that the inaugural meeting of the **new Board** took place on Tuesday, 14<sup>th</sup> June at the Embassy of Sweden in Budapest. The Board unanimously voted **Anita Gyóni-Maksa (ABB)** and **György Nagy (Sigma Technology)** for the **two Vice President positions**, and **László Nith (Nefab)** for **Chief Economy Officer**. I want to thank Anita, György and László for their candidacy, and I wish them all the best in their new roles!

Based on the valuable input from the workshop at the General Assembly one month ago, the Board agreed to have the following focus points during the autumn:

- Continue to discuss **labor and management related challenges** within the frame of the CEO & HR Forums.
- Communication and events along **Swedish values**, with focus on **sustainability and equality**. Plan a publication of a **sustainability brochure** to highlight Swedish best practices and company strengths and discuss present-day questions in this topic. More information on participation will come soon.
- Develop **dialogue with decision makers**, with the Chamber taking a proactive, advisory (and not only a “listener”) role.
- Pandemic situation and company policies permitting, we will also organize thematic **networking events** to encourage personal contacts among members. We saw great interest on the General Assembly for a **wine tour** during the autumn. We will get back with a suggestion on a trip within a few days.

I wish everybody a peaceful and relaxing summer!

Roland Jakab,  
President SCCH
